List of figures and tables viii
Preface x
Acknowledgements xiv

1 Between Islamic affiliation and gender inequality 1
   Five aspects of gender inequality 2
   Possible mechanisms of sexual stratification 2
   Religiosity as a mechanism of gender inequality 6
   Family processes as a mechanism of gender inequality 10
   Changes and persistence in family life among Uyghurs 11
   How do family processes affect gender inequality? 15
   Do family processes matter? 21

2 Historical contexts and research design 24
   Xinjiang and Urumchi 24
   The demographic history of Uyghurs and Han Chinese in Xinjiang 27
   Islam in Xinjiang 33
   Fieldwork in Ürümchi 36
   Analytic methods 39
   Dependent variables 39
   Independent variables 40

3 A hard choice: to work or not to work? 48
   Gender gaps in employment in China 50
   Muslim women's labour supply 51
   Field observations in Ürümchi 53
   Why are women less likely than men to be employed? 57
   Is religion related to female labour-force participation? 62
   Religiosity and Muslim women's labour supply 64
Contents

Does religiosity affect gender inequality in work in Ürümchi? 64
Do family processes affect women’s market behaviour? 68
Family processes and gender inequality in employment in Ürümchi 71
Supplementary analyses 75

4 Why do Uyghur men earn more than Uyghur women? 77
The gender earnings gap in China 78
Gender earnings gaps among Uyghurs 79
Why do women earn less than men? 81
Is religious affiliation related to earnings? 85
Religiosity and gender inequality in income 85
Religiosity and Uyghur women’s earnings 87
Family processes as a determinant of earnings 89
Family processes and gender inequality in income 91
Supplementary analyses 93

5 Who does household chores? 95
Why are gendered divisions of household chores important? 95
How are household tasks measured? 97
Gender inequality in housework among Uyghurs 99
How can gendered divisions of household chores be explained? 106
Religiosity and the allocation of household chores 109
Religiosity and housework among Uyghur couples 110
Family processes and housework among Uyghurs 115
Supplementary analyses 120

6 Who manages the household? 122
Why must household management be studied? 123
How is household management measured? 124
Gender and household management 125
The gendered division of household management in Ürümchi 126
Possible accounts of the gendered division of household management 134
Religiosity and household management 135
Family processes and household management 140
Supplementary analyses 144

7 Who's the boss? 146
What is family power? 146
The distribution of family power among Uyghurs 148
Relative resources and gender inequality in domestic power 152
Gender ideology and family power 156
Islamic affiliation and family power 157
Religiosity and family power in Ürümchi 158
Family work and spousal power 161
Family processes and domestic power 165
Supplementary analyses 169

8 All in the family 172
Gender inequalities and parities among Uyghurs 172
Why is religiosity a weak mechanism of gender inequality? 174
Why are family processes a major mechanism of gender inequality? 177
Policy implications 179

Notes 181

Figures

2.1 The Ürümchi Railway Station 26
2.2 Uyghur population growth, 1761–2003 (1,000) 28
2.3 Uyghur men in Ürümchi 29
2.4 Population distribution of Uyghurs and Han Chinese in Xinjiang (%) 30
2.5 Population distribution of Uyghurs and Han Chinese in Ürümchi (%) 32
2.6 Uyghur costumes 33
2.7 Friday afternoon prayers by Uyghur men 34
2.8 Uyghur women during Friday afternoon prayers 46
3.1 A Uyghur food stall in Ürümchi 53
3.2 Uyghur women vendors in Ürümchi 54

Tables

1.1 Uyghur-Han comparisons of socio-demographic characteristics 3
1.2 Gender inequalities in Muslim countries and non-Muslim countries 4
2.1 Population distribution of ethnic groups in Xinjiang (1,000) 31
2.2 Sampled Ürümchi streets, 2007 37
2.3 Sample selection for data analysis 38
2.4 Control variables 41
2.5 Uyghur religiosity in Ürümchi (%) 45
2.6 Family variables 47
3.1 Female to male economic activity rates by regions: 1970–2005 (%) 52
3.2 Gender differences in full-time employment in Ürümchi (%) 56
3.3 Bivariate analyses of religiosity and employment (%) 65
3.4 Multivariate analyses of religiosity and gender gaps in work 67
3.5 Family processes and full-time employment (%) 73
3.6 Multivariate analyses of family processes and gender gaps in work
3.7 Comparisons of logistic regression models of employment
4.1 Ratios of estimated female to male earned income by regions (%)
4.2 Gender differences in mean gross monthly income (¥)
4.3 Religiosity and income (¥ per month)
4.4 Religiosity and gender gaps in income in Ürümchi
4.5 Family processes and gender gaps in mean monthly income (¥)
4.6 Family processes and gender gaps in earnings
4.7 Comparisons of OLS models of earnings
5.1 Nonparametric analyses of housework allocation
5.2 Allocation of household chores among Uyghur families (%)
5.3 Religiosity and the allocation of household chores (%)
5.4 Multivariate analyses of religiosity and housework allocation
5.5 Family processes and the allocation of household chores (%)
5.6 Multivariate analyses of family processes and housework allocation
5.7 Comparisons of multinomial models of household chores
6.1 Nonparametric analyses of household management
6.2 Background characteristics and household management (%)
6.3 Religiosity and the distribution of household management
6.4 Multivariate analyses of religiosity and household management
6.5 Family processes and the distribution of household management (%)
6.6 Multivariate analyses of family processes and household management
6.7 Comparing multinomial models of household management
7.1 Nonparametric tests of power and authority
7.2 Background characteristics and the distribution of family power (%)
7.3 Religiosity and the distribution of family power (%)
7.4 Multivariate analyses of religiosity and family power
7.5 Family processes and the distribution of family power (%)
7.6 Multivariate analyses of family processes and family power
7.7 Comparing multinomial logistic regression models of family power
