4.8 THE GREEK-SERBIAN RELATIONS	43
4.9 THE GREEK-MACEDONIAN RELATIONS	45

INTRODUCTION

This book contains two parts; in the first part, the anti-Turkish establishment in Greece has been analysed. As an orientalist and as a historian, the author has made his evaluations on the state of Greek society which is forming the stance of the society and the implementation of policies towards Turkey. As an orientalist, Dr. Muhammad Cosmas Megalommatitis knows Turkish society very well. He has several books and articles on Turkey in history, in archaeology and in political aspects of Turkey, and on the neighbouring countries. He has also made remarkable evaluations on the establishment of the Greek society.

In the second part of this book, the relations of Greece with the Balkan countries have been deeply analysed. Historical observations and evaluations of the author have been expressed carefully as an outcome of a academic accumulation of Dr. Megalommatitis.

In particular, critical observations and evaluations on the recent questions in the Balkans and in Turkish-Greek relations have been wisely shown from an intellectual's and scholar's point of view. This book will fill the gap in knowledge about issues concerning the Turkish Greek relations and the relations of Greece with other Balkan countries.
