THE CHINESE PEOPLE'S MOVEMENT
Perspectives on Spring 1989

Edited by Tony Saich

The pro-democracy demonstrations of April–May 1989 heralded the awakening of public opinion in urban China; their brutal suppression in June revealed a Communist Party leadership severely out of touch with its own society and its aspirations.

The contributors to this timely book, a number of whom witnessed the events described, place these dramatic events within the broader context of China's developmental experience. Rather than an instant reaction and description, however, this book grows out of the ongoing research interests and keen observational skills of the contributors. Therefore, it provides an historical, developmental, societal, cultural, and political context for the tragic events in terms of their antecedents, their ramifications, and their impact on the history of the Chinese people's movement.

... Nothing reflected the current political situation in China more dramatically than last year's June 4th events in Tiananmen Square. And no book comes closer to revealing the many-sided quality of those events than The Chinese People's Movement. Historical context, the events themselves, the philosophical underpinnings, political learning, the drama of a civil society struggling for life and a democracy trying to be born—all are fully and clearly depicted. This book is extremely sophisticated—indeed, it is a tour de force. Both the editor and the contributors are to be congratulated.
