Acknowledgments

I AM DEEPLY INDEBTED to more institutions and individuals than I can possibly acknowledge by name for their assistance and support, which made this book possible. I must mention a few. The Committee on Scholarly Communication with the People's Republic of China (of the National Academy of Sciences, Social Science Research Council, and American Council of Learned Societies) made a research grant to me that covered the bulk of my costs during my research in 1988, and they also assisted in my discussions and negotiations to arrange my itinerary and travel in China. I wish to thank especially Mary Bullock, then director of the Committee on Scholarly Communication, Michel Oksenberg, of its National Program for Advanced Study and Research in China, and staff members Kyna Rubin and Caroline Reeves.

The Chinese Academy of Social Sciences was my principal host organization in China, and as such it assisted me in innumerable ways, arranging my travel, communicating my requests to several local host organizations in China, providing escorts for many of my trips, and setting up a large number of interviews and visits to institutions. I am indebted to a great many individuals at the Academy, including several of its leaders, particularly Li Shen zhi and Zhao Fusan, and many staff members. I wish to thank here especially those staff members who were most directly involved in making arrangements for me and accompanying me on my journeys: Lin Di, Wu Yu, and Tsao Dapeng. For a period of about a month, my host organization in Shanghai and throughout the Yangzi valley region was the Shanghai People's Association for Friendship with Foreign Countries, which financed my stay in that region. I wish to give special thanks to Li Shoubao, as well as his son Li Yaping, who arranged my schedule and accompanied me on my travels. In addition, in every place that I visited, leaders and staff members of the local Academies of Social Sciences or Foreign Affairs Bureaus helped me in a great many ways; they are too numerous to mention by name. However, I would like to thank, specifically, Zhang Xiangrong, the young member of the Chengdu Academy of Social Sciences who accompanied me for almost a month during my travels in Sichuan Province. I am also grateful to the hundreds of people whom I interviewed all over the country who patiently answered my questions; this book is, above all, about what I learned from them as well as about what I observed on my travels. I wish to express my sincere appreciation to Vivian Hogan and Jean Schlessinger, who typed my manu-

Note on Romanization

THE BASIC SYSTEM used in this book for romanization of Chinese names and terms is Pinyin, which the government of the People's Republic of China adopted for use in China starting January 1, 1979. (The only exceptions are a few Chinese names best known in the West in other romanized forms.) For the benefit of readers who are more familiar with the Wade-Giles system, the Wade-Giles form is given in parentheses for some names. (My earlier writing on west China, contained in *China on the Eve of Communist Takeover*, used the Wade-Giles system.)

A.D.B

script. I also wish to thank the Paul H. Nitze School of Advanced International Studies of Johns Hopkins University, in particular Dean George R. Packard, for continuing support of my work after my retirement in 1989. Finally, I wish to express my appreciation to those at Westview Press who helped to produce this book: Susan L. McEachern, acquisitions editor; Jane Raese, production editor; Sarah Tomasek, copy editor; Polly Christensen, art director; and Patricia Isaacs, cartographer.
