The Royal Hordes: Nomad Peoples of the Steppes

E. D. PHILLIPS

The very word *nomad* is exciting—and the nomads have always stirred the imagination of those who live in settled, humdrum communities. But nomads have also been a threat to the peace of urban dwellers whose affluence they coveted, and nomads have often determined the course of civilizations and empires. The dual story of nomadism—as a way of life, and as a destroyer of other ways of life—is told here from its probable origins in the primitive farming of the fourth millennium B.C. to the end of the first age of the mounted nomads marked by the advance of the Huns in the fifth century A.D. It is told in rich detail—the treasures found in the graves of legendary chiefs at such sites as Maikop, Kul Oba, Pazyryk, Noin Ula; the mode of life that was an extraordinary blend of barbarism and great sophistication; the vigor and startling conventions and distortions of nomadic art; the folkloric and military and social history; the romance and the legend.

E. D. Phillips, who has for many years made a study of nomadic life, is Reader in Greek at the Queen's University of Belfast.

Egypt to the End of the Old Kingdom

BY CYRIL ALDRED

"Man fears time, yet time fears the pyramids," the Arabic proverb goes. In this book the most recent expert findings of archaeology are brought together to describe the slowly evolving civilization whose zenith was reached with the Pyramid Age that planned its monuments for all eternity.

Early Mesopotamia and Iran

BY M. E. L. MALLOWAN

The ancient 'Land of the Two Rivers' known geographically as Mesopotamia, and now Iran, is the Biblical site of Noah's Flood. Recent archaeological discoveries confirm the Old Testament story of an all-obliterating flood from which rose the great Sumerian civilization of the third millennium BC, with its astonishing scientific knowledge and tremendous artistic achievement. A distinguished archaeologist reveals these findings and paints a superb portrait of Sumeria.
