Introduction

As an assembly our most important target is to tell our countries the truthfull case about the problems of Cyprus, Egean, Ermenian starting with Saudi Arabia and then to all Islamic countries. The subject we are dealing today is "The tragedy of the Muslim Turks in Bulgaria". We want to take this heard in the Islamic Universe and so we will try to do our part for getting support for them.

As it is known Turks are not the only minority living in Bulgaria There are also Ermenian and Greek minorities. The making of pressure and bad treatment only to Turks and not touching the others is sourced not for them being Turks but for being Muslims. It is impossible for Islamic Universe to stay silent to this event.

In the world, of countries where majority is Muslim, the weightiness is day after day is increasing. As the weightiness increases, following this the pressure on Muslim minorities are gradually increasing. Of its first example which is extending into Europe is experienced in Bulgaria. Not to forget the total population where Muslims are minorities can not be underestimated at all. There is also a country where the Muslims are the minorities however the population of them is reaching almost 100 Million.

In this situation can the countries as it is in Bulgaria say that "this is our own problem, own domestic problem". If this is said can the Islamic Universe stay silent? Not to reject the tyranny and oppression in Bulgaria is to permit the other countries to propose that "you can tyrannise too, naturally this is your problem". Henceforth they can start to tyrannise, in Greece the Turkish minority which is all Muslim, in Sovviet Russia the Muslim minority of which the majority is Turk and maybe in Germany the Workers are both Turks and Muslims.

There is a very important point which is forgotten that these people who have been living as Turks for hundrets of years and who have been Muslims since the year 1400 will not refuse their origin with oppression. The truth will not be changed by taken the petition away from the hand, by changing certificate of birth, these things will only change their label. This kind of act of a country is very surprising for she knows so little of her own people. It is not true to actuate these people who has been sitting silently beside the reins until today. There will be a great noise which will be stronger than the considered noise, to stand up from the place they have been sitting even though they are only minority.

"The tragedy of the Muslim Turks in Bulgaria" is on show not only for 2 or 3 months but it is on for years. The non-silence of the Islamic Universe, the handling of the subject in many directions is very meaningful.
