Praise for TURKEY'S NEW GEOPOLITICS

"This is an important contribution to the heretofore largely absent debate on Turkey's role in the aftermath of the collapse of the USSR and the Eastern bloc. The authors provide a clear and concise analysis of the various options facing Turkey, one which will benefit not only western planners and scholars but Turkish policymakers as well, as they attempt to chart new courses for Turkey in the 'New World Disorder' which surrounds this long-time key western ally."

—Heath W. Lowry, Executive Director
Institute of Turkish Studies

With the astonishing transformations in the geopolitics of the world since the collapse of the Soviet Union, Turkey has been profoundly affected by the changes on its periphery. For the first time since the beginning of the century, a Turkic world has blossomed, giving Turkey potential new foreign policy clout from the Balkans across the Caucasus and into Central Asia and Western China.

These geopolitical opportunities have dramatically changed the character of Turkey itself, once an isolationist, Eurocentered NATO ally. At the same time, Turkey has undergone an internal evolution over the last decade, making it an attractive model of Middle Eastern development because of its increasingly free market, democratic governance, and secularist outlook.

This book explores the character of the new Turkey, assessing its foreign policy options and interpreting the significance of those choices for the Middle East, Central Asia, Europe, and the United States.

Graham E. Fuller and **Ian O. Lesser** are both members of the International Policy Department at RAND. **Paul B. Henze** is a resident consultant at RAND. **J. F. Brown** is a consultant at RAND and Distinguished Scholar in Residence at the RFE/RL (Radio Liberty) Research Institute in Munich.
